

In the Claims

Kindly substitute the following amended claim 31 for pending claim 31:

31. (once amended) An automated banking machine comprising:

a computer;

a browser operating in the computer;

a sheet dispenser mechanism in operative connection with the computer, wherein the sheet dispenser mechanism is operative responsive to receipt of at least one HTML format document by the browser, to dispense at least one sheet from the automated banking machine.

Kindly substitute the following amended claim 35 for pending claim 35:

35. (once amended) An automated banking machine comprising:

a computer;

a browser operating in the computer;

a card reader in operative connection with the computer;

ε²
a sheet dispenser mechanism in operative connection with the computer, wherein the computer is operative responsive to reading indicia on a card with the card reader to cause the browser to receive at least one document, and wherein the computer is operative responsive to receipt of at least one document by the browser, to enable the sheet dispenser mechanism to operate to dispense at least one sheet from the automated banking machine.

Kindly substitute the following amended claim 38 for pending claim 38:

38. (once amended) An automated banking machine comprising:

a computer including HTML document handling software operating in the computer;

ε³
a card reader in operative connection with the computer;

a sheet dispenser in operative connection with the computer, wherein the computer is operative responsive to reading indicia on a card with the

E3
card reader to cause the computer to operate to receive at least one HTML document, and wherein the computer is operative responsive to the at least one HTML document to enable the sheet dispenser to dispense at least one sheet from the automated banking machine.

Kindly add new claims 48-54 as follows:

48. (newly added) The method according to claim 31 wherein the automated banking machine comprises an Automated Teller Machine (ATM), wherein the sheet dispenser mechanism is operative responsive to receipt of at least one HTML format document by the browser to dispense at least one sheet from the ATM.

E4
49. (newly added) The method according to claim 35 wherein the automated banking machine comprises an Automated Teller Machine (ATM), wherein the computer is operative responsive to receipt of at least one document by the browser to enable the sheet dispenser mechanism to operate to dispense at least one sheet from the ATM.

50. (newly added) The method according to claim 38 wherein the automated banking machine comprises an Automated Teller Machine (ATM), and wherein the computer is operative responsive to the at least one HTML document to enable the sheet dispenser to dispense at least one sheet from the ATM.

51. (newly added) An automated banking machine comprising:

a computer, wherein the computer is adapted to receive at least one mark up language document, and wherein the computer is adapted to operate responsive to the at least one mark up language document to cause at least one sheet to be dispensed from the automated banking machine.

E4
52. (newly added) The automated banking machine according to claim 51 wherein the sheet comprises a note, and wherein the computer is adapted to operate responsive to the at least one mark up language document to cause at least one note to be dispensed from the automated banking machine.

53. (newly added) The automated banking machine according to claim 52 wherein the note comprises cash, and wherein the computer is adapted to operate responsive to the at least one mark up language document to cause cash to be dispensed from the automated banking machine.

54. (newly added) The automated banking machine according to claim 53 wherein the automated banking machine comprises an Automated Teller Machine (ATM), and wherein the computer is adapted to operate responsive to the at least one mark up language document to cause cash to be dispensed from the ATM.
